

CFM R Series

The CFM R Series is specifically designed for use in packaging applications in industries such as food and pharmaceutical. The features of the R Series make it ideal for removing excess lateral trim and scraps during packaging processes.

Fixed installation on textile cutting machine.

Removal of lateral trim and scraps on packaging equipment.

FEATURES & BENEFITS

CFM R SERIES

-  Three-phase regenerative blower allows vacuum to run virtually maintenance-free for long periods of time.
-  High vacuum pressure compresses the collected debris to optimize the 30- to 56-gallon collection capacity.
-  Motor protection device provides a secondary cooling air source to prevent motor burnout, making the vacuum reliable in continuous duty applications.
-  Viewing window indicates when bag needs to be emptied.
-  Mounted on wheels for easy maneuverability.
-  Heavy-duty, epoxy-painted steel or stainless steel collection container.
-  Container latches provide quick access to the collection tank for easy disposal.
-  Quiet operating performance for user comfort.

OPTIONS

- Additional inlets.
- Various inlet diameters.
- Polyester filter bag.
